

The cleanroom shrinks to it's real dimension

ISO class 4	conventional cleanroom	microtecfab [®]	factor
invest	€ 150.000,00	€ 30.000,00	5 : 1
energy	16 MWh	4.2 MWh	3,8 : 1
garments	€ 5.000,00	€ 2.750,00	1,8 : 1

(This example was calculated for the number of 5 processes)

- micro systems require less space
- set the trend off conventional cleanrooms
- combinable local cleanrooms in modular architecture with defined interfaces
- adaptable to special user requirements
- cleanroom shrinks to actual process environment
- much less investment and running costs
