

**Submitted by: 31.01.2012**

**Form:** Paper

**Length:** 15 - 20 minutes (suggest sites: 15)

**Poster:** **DIN** A1 (594 x 841mm)

**Content:** The conference »elmug4future« demonstrates current research projects, innovative development results and successful applications and trends in the industry of electronic measuring equipment and technology.

**For the series of lectures we expect:**

- Research and development, with a view into the future
- Innovative solutions that open up new market segments
- Best-practice examples, which are the trends of tomorrow

**Focus of the 2012 Conference:**

- Sensors and Sensor Systems
- Industrial Metering
- Micro-Nano-Handling / Precision Engineering
- Analytical and Laboratory Technology
- Electronics Technology / AVT
- Power Electronics
- Measuring and Testing / Standards
- Cleanroom Technology

At the technology conference, the speakers also contribute for the costs at the conference. The reduced conference fee for speakers is 50.00 € plus applicable VAT.

Advertising for products during the sessions are not allowed. You can make a short presentation in a separate session for enterprises.

The conference language will be German. English papers are welcome. Please use this document for filing the application. Keep it short and simple.

A confirmation e-mail will be sent at the end of January. The abstracts will be published at: [www.elmug4future.de](http://www.elmug4future.de).

The documents you will find at: [www.elmug4future.de](http://www.elmug4future.de). For further information please contact us.
